

# BODYSHOP

"FROM SPRAY GUNS AND THEIR ACCESSORIES, TO BODY REPAIR KITS AND DUST-FREE TOOLS, THE FOLLOWING PAGES CONTAIN A WIDE RANGE OF EQUIPMENT DESIGNED FOR THE PROFESSIONAL BODYSHOP."

## HIGH VOLUME LOW PRESSURE HVLP TECHNOLOGY

### HVLP Technology

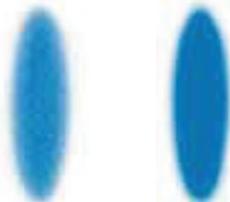

HVLP Spray Guns are designed to run at a low pressure with a high volume of air. This helps reduce the 'bounce back effect' optimizing transfer efficiency, saving on paint costs. The HVLP range of spray guns work on a minimum 70% transfer efficiency.

### Typical Spray Patterns

Traditional

HVLP

\* Diagrams are representative of typical spray patterns

### WHY HVLP?

- Superior method of spraying.
- More efficient.
- More control of spraying operation.
- More environmentally friendly.
- Improved health & safety due to reduced bounce back.
