

GARAGE & WORKSHOP

“OUR GARAGE AND WORKSHOP RANGE INCLUDES ALL OF THE ESSENTIAL EQUIPMENT NEEDED TO MEET THE DEMANDS OF THE MODERN WORKSHOP.”

Whether you need a new workshop press, equipment for cleaning vehicle components, or starter/chargers that are compatible with the latest Stop Start or Lithium batteries, the following pages have it covered.

WHAT'S NEW?

Sealey have teamed up with Schumacher, the USA's largest manufacturer & distributor of battery starters & chargers, to bring you a great new range that will rival all others.

Faster - Safer - Smarter

Speed Charge patented technology actively monitors the charge acceptance of the battery, along with the temperature. It then adjusts the charge accordingly, ensuring the battery is charged as fast and safely as possible - up to 3 times faster than traditional chargers.

Automatic voltage detection of 6V or 12V battery.

Automatic microprocessor controlled battery charger/maintainer.

ELECTRIC CHARGER/STARTERS

We have some of the most advanced European designed and built Starter/Chargers. These incorporate the latest control systems, protection protocols and dedicated battery support functions required for Flash memory diagnostics and reprogramming.

BOOSTER CABLES

ARE YOU GETTING WHAT YOU PAY FOR?

COMPETITOR'S

SEALEY'S

The left-hand picture shows a competitor's 25mm² cable. It has similar external dimensions but when compared to the right hand picture, which is our Model No. BC/25/3.5, it has 67% less copper. The cable in the left picture actually uses 17% less copper than the 10mm² cable in our Model No. BC/10/2.5. Not only are you paying for something you are not getting, the performance will also be very poor in comparison. See pages 292-293.

LOGOS EXPLAINED

Our standard range of presses. Designed for the professional user in a demanding workshop environment, the Yankee range offers great value for money.

Our top of the range presses featuring heavy-duty frames with ram assemblies that can slide left or right, allowing greater flexibility during use.

Easily connects to all types of batteries including Lead Acid & Calcium batteries.

Battery Support Unit.

Dedicated charging programmes for AGM/gel, conventional, leisure and stop/start batteries, with fully automated charging algorithms including de-sulphating mode.

Dual Voltage.

De-sulphating mode enables deeply discharged batteries to be charged.

Surge & Spike Protection.
