

VEHICLE SERVICE

“THE SERVICE TOOL MARKET IS CONSTANTLY CHANGING AS VEHICLE MANUFACTURERS SEEK NEW WAYS TO IMPROVE THEIR DESIGNS AND MAKE THEIR VEHICLES EVEN MORE ECONOMICAL AND FUEL EFFICIENT.”

Sealey have a dedicated team of buyers - all of whom are trained technicians with decades of practical experience. They are constantly looking at vehicles entering the aftermarket and where a specific tool is identified as being required, it is then designed and sourced accordingly. Many of our service tools have been designed in-house and all have been extensively tested in our purpose built workshop or within the motor trade prior to launch.

Official suppliers of Autel in the UK

THE MOST COMPREHENSIVE RANGE OF INNOVATIVE CODE READERS/SCANNERS

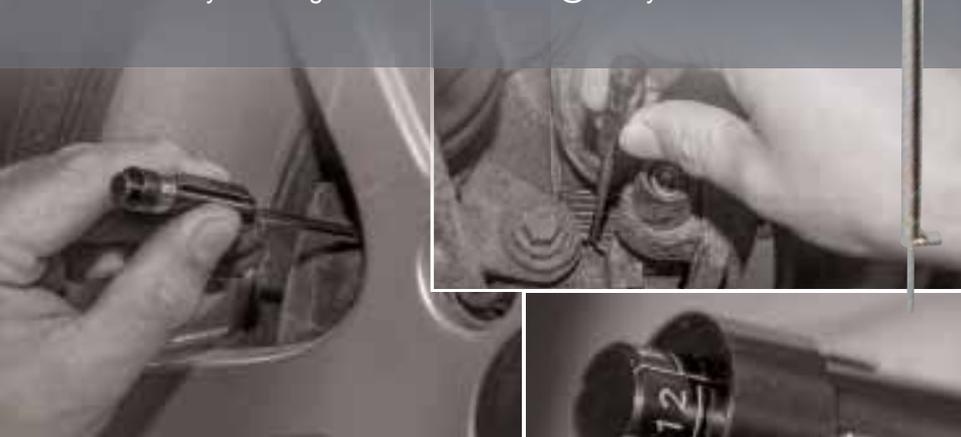

THE DNA OF A PRO AT A PRICE YOU CAN AFFORD

DO YOU HAVE A PRODUCT IDEA WE MAY BE INTERESTED IN?

PATENTED

Our buyers are always searching for new products, but we also welcome suggestions from our customers on both new products ideas and improvements that could be made to existing items.

Whilst we may not be able respond to all suggestions, we will follow up any promising ideas with a view to bring them to the market. An example of this is our Brake Pad Thickness Gauge, which was suggested to us by a technician and is now patented and part of the range. Email your design or idea to technical@sealey.co.uk.
